

320-0001 Trading Command

[320 Card Drop](#)

The trade command will allow users to give one of their cards to another user in exchange for one of their cards.

Command

The command will follow the following syntax:

```
/trade <user> <give> <receive>
```

For example:

```
/trade user:@Vylpes give:1001 receive:2002
```

Will trade with Vylpes your card 1001 in exchange for their 2002.

This will then ping the user with an embed to allow the other user to see the trade, and have 2 buttons to accept or decline the trade.

The user will have 15 minutes to complete the trade before it expires.

Tasks

- Create base `/trade` command
- Check that each user has the cards to trade with
- Generate the embed to send to the user
